Endnotes:

¹ BSA's 2003 piracy statistics were not available as of February 13, 2004 when IIPA filed its submission but are now available as "preliminary" and were posted on the IIPA website at www.iipa.com on March 2X, 2004. These statistics for 2003 will be finalized in mid-2004 and also posted on the IIPA website. BSA's statistics for 2002 were finalized in mid-2003, and revised figures are reflected above. BSA's trade loss estimates reported here represent losses due to piracy which affect only U.S. business software publishers in each country, and differ from BSA's trade loss numbers released separately in its annual global piracy study which reflect losses to (a) all software publishers in each country (including U.S. publishers) and (b) losses to local distributors and retailers in each country.

² ESA's reported dollar figures reflect the value of pirate product present in the marketplace as distinguished from definitive industry "losses." The methodology used by the ESA is further described in Appendix B of this report.

³ Paraguay: RIAA reports that its estimated losses to the records and music industry include both domestic piracy in Paraguay and estimated losses caused by transshipment.

"GSP" means that the U.S. government is reviewing this country's IPR practices under the Generalized System of Preferences trade program.
