Endnotes:

<sup>1</sup> BSA's 2007 statistics are preliminary. They represent the U.S. software publishers' share of software piracy losses in the country, and follow the methodology compiled in the Fourth Annual BSA and IDC Global Software Piracy Study (May 2007), available at <http://w3.bsa.org/globalstudy/>. These figures cover, in addition to business applications software, computer applications such as operating systems, consumer applications such as PC gaming, personal finance, and reference software. BSA's 2006 piracy statistics were preliminary at the time of IIPA's February 12, 2007 Special 301 filing and were finalized in June 2007 (see <http://www.iipa.com/statistics.html>) as reflected above.

<sup>2</sup> MPAA's trade losses and piracy levels for 2006 and 2007 are not available. Details regarding MPAA's methodology for 2005 and prior years are found in Appendix B of the 2008 IIPA submission.

<sup>3</sup> ESA's reported dollar figures reflect the value of pirate product present in the marketplace as distinguished from definitive industry "losses." The value of pirate product in the market in the Philippines reflects only the value of pirate product for personal computers. ESA's methodology is described in Appendix B of IIPA's submission.

"OCR" means out-of-cycle review to be conducted by USTR.
