Endnotes:

¹BSA's 2007 statistics are now final. BSA statistics represent the U.S. publishers' share of software piracy losses in each country, and follow the methodology compiled in the Fourth Annual BSA/IDC Global Software Piracy Study (May 2007), available at <http://www.bsa.org/globalstudy/>. These figures cover, in addition to business applicates software, computer applications such as operating systems, consumer applications such as PC gaming, personal finance, and reference software.

²MPAA's trade losses and piracy levels for 2006 and 2007 are not available. Details regarding MPAA's methodology for 2005 and prior years are found in Appendix B of the 2009 IIPA submission.

³ESA's reported dollar figures reflect the value of pirate product present in the marketplace as distinguished from definitive industry "losses." ESA's methodology is described in Appendix B of IIPA's submission.

"GSP" means that the U.S. government is reviewing this country's IPR practices under the Generalized System of Preferences trade program.

"OCR" means out-of-cycle review to be conducted by USTR.
